C3 - Support Army Acquisition (Command Contracting) : Sep-05

C3a - Dollar Weighted ALT - 3Q05

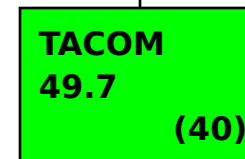

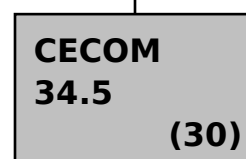

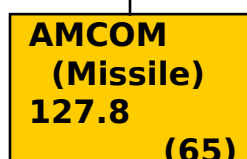

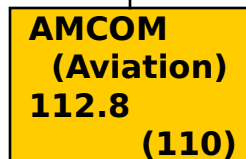

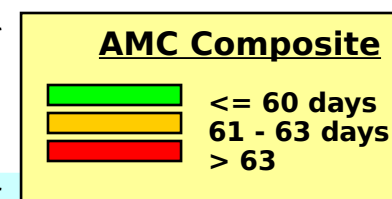

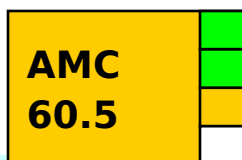

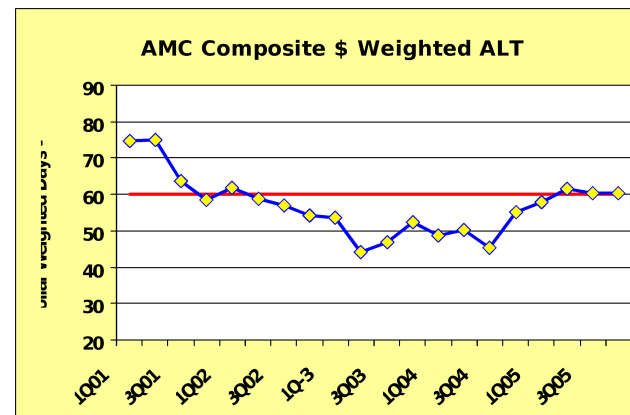

Associated SRS Objective: Level-1, C3 - Support Army Acquisition

Measure: C3a - Dollar Weighted ALT

Level 1 Owner: Jeff Parsons

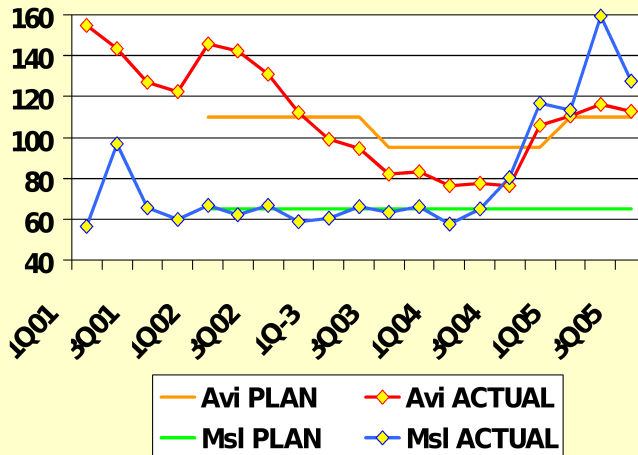

Measure Definition:

Dollar Weighted ALT is derived from the Budget Stratification Report. The lead time for each part is projected based on the last representative buy, then multiplied by the dollar value and average demand of the item to get the total inventory requirement (in dollars). The sum of requirements for all items is divided by the average demand of all parts (again in dollars) to get an equivalent number of days.

C3b - Dollar Weighted PLT - 3Q05

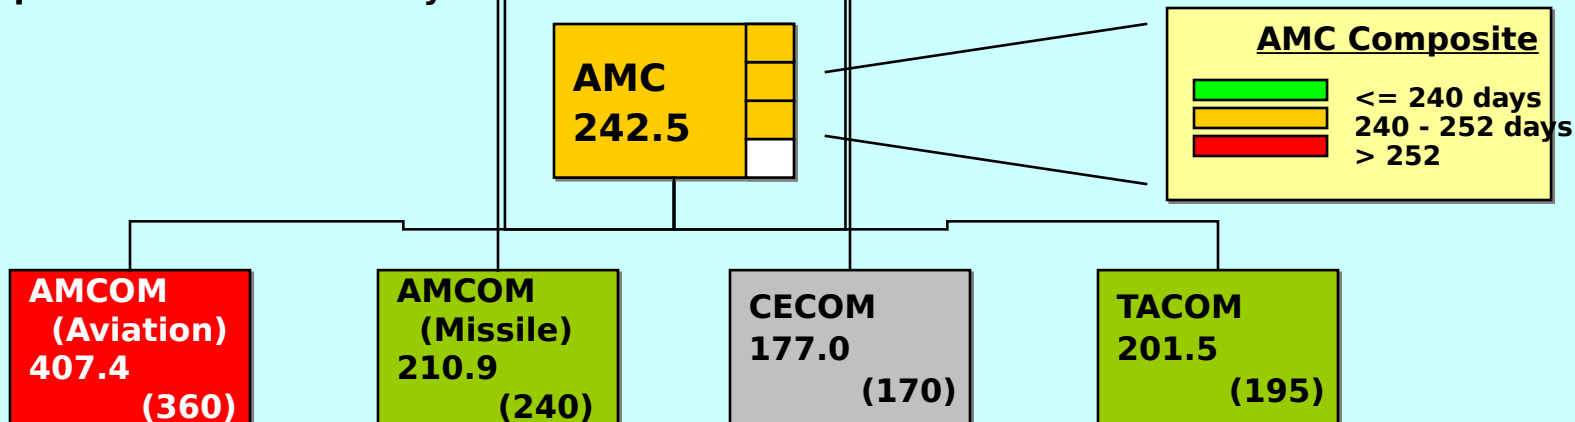

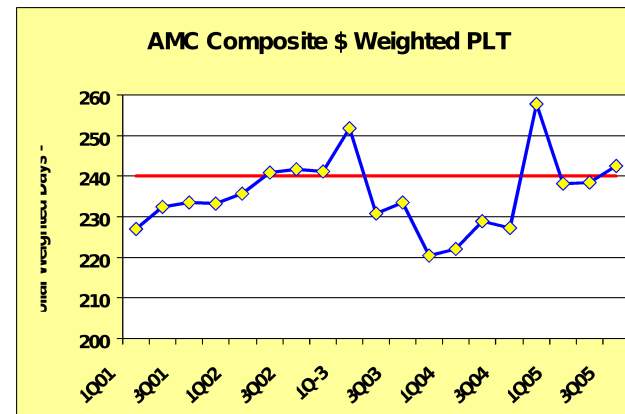

Associated SRS Objective: Level-1, C3 - Support Army Acquisition

Measure: C3b - Dollar Weighted PLT

Level 1 Owner: Jeff Parsons

Measure Definition:

Dollar Weighted PLT is derived from the Budget Stratification Report. The Production Lead Time for each part is projected based on the last representative buy, then multiplied by the dollar value and average demand of the item to get the total inventory requirement (in dollars). The sum of requirements for all items is divided by the average demand of all parts (again in dollars) to get an equivalent number of days.

C3c - % Dollars on LTCs - 4Q05

Associated SRS Objective: Level-1, C3 - Support Army Acquisition

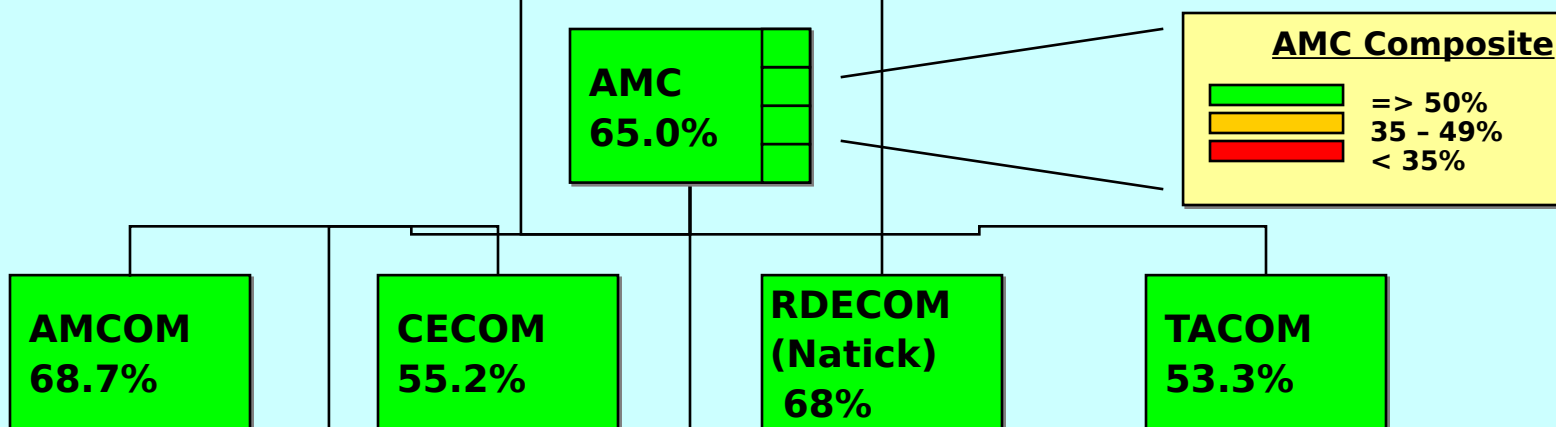

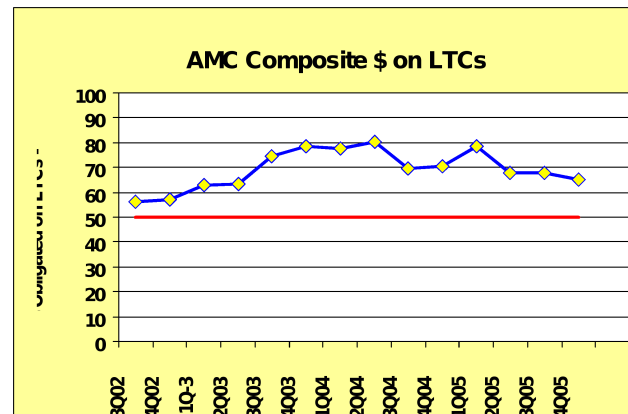

Measure: C3c - % Dollars on LTCs

Level 1 Owner: Jeff Parsons

Measure Definition:

For secondary items, the total value of obligations on Long Term Contracts (LTCs) divided by total obligations for the period. LTCs are defined as three years or more in length with pre-priced CLINs for ordering of secondary items. They may be IDIQs, BOAs or "C" type contracts with priced ordering provisions for spare parts - Excludes production contracts w/ options only for future lots.

BRIEFINGS

C3d - % Delinquent CLINs - 4Q05

Associated SRS Objective: Level-1, C3 - Support Army Acquisition

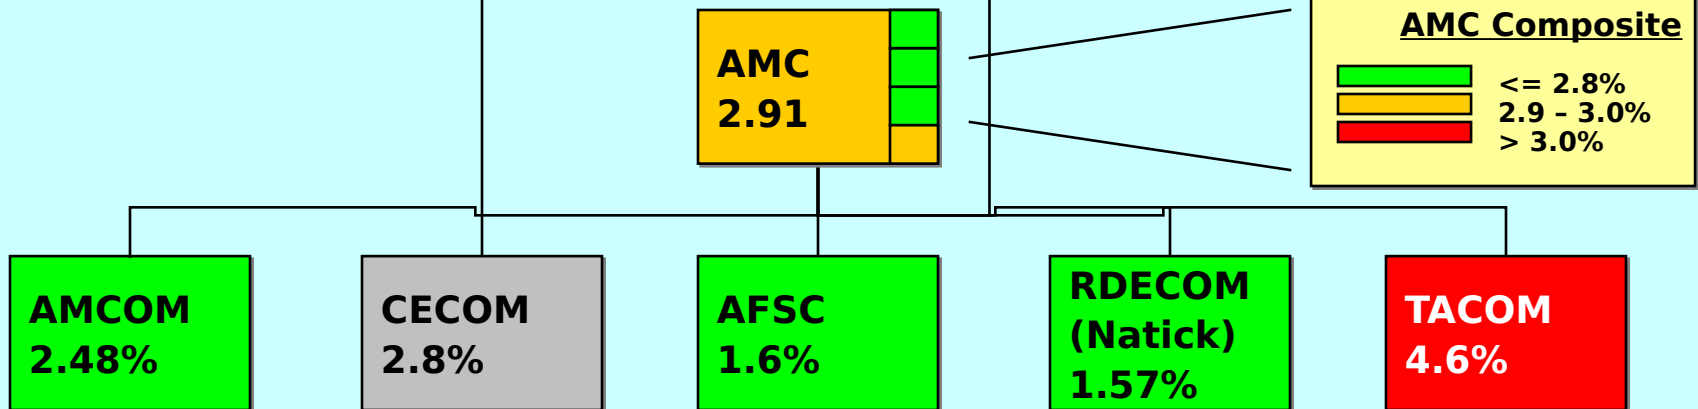

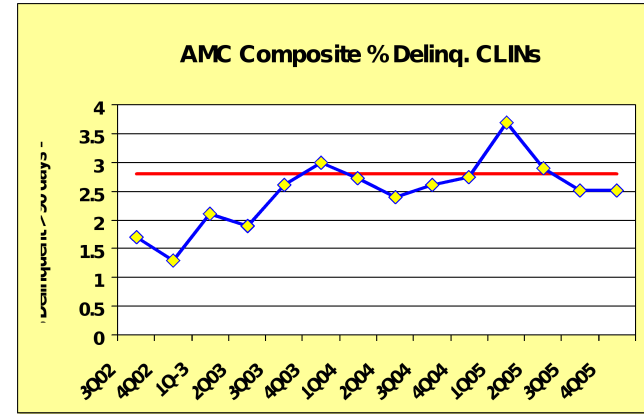

Measure: C3d - % Delinquent CLINs

Level 1 Owner: Jeff Parsons

Measure Definition:

The percentage is determined by dividing the total number of delinquencies in excess of 90 days by the number of "Open CLINs". The quotient will be expressed to one decimal place, all other entries will be whole numbers. The total percentage of delinquent, active CLINs is measured against a goal of 2.8%. 90 days was chosen as the cut-off point to avoid false delinquencies resulting from delays in processing or receiving documentation.

C3e - Avg # Days to Definitize - 4Q05

Associated SRS Objective: Level-1, C3 - Support Army Acquisition

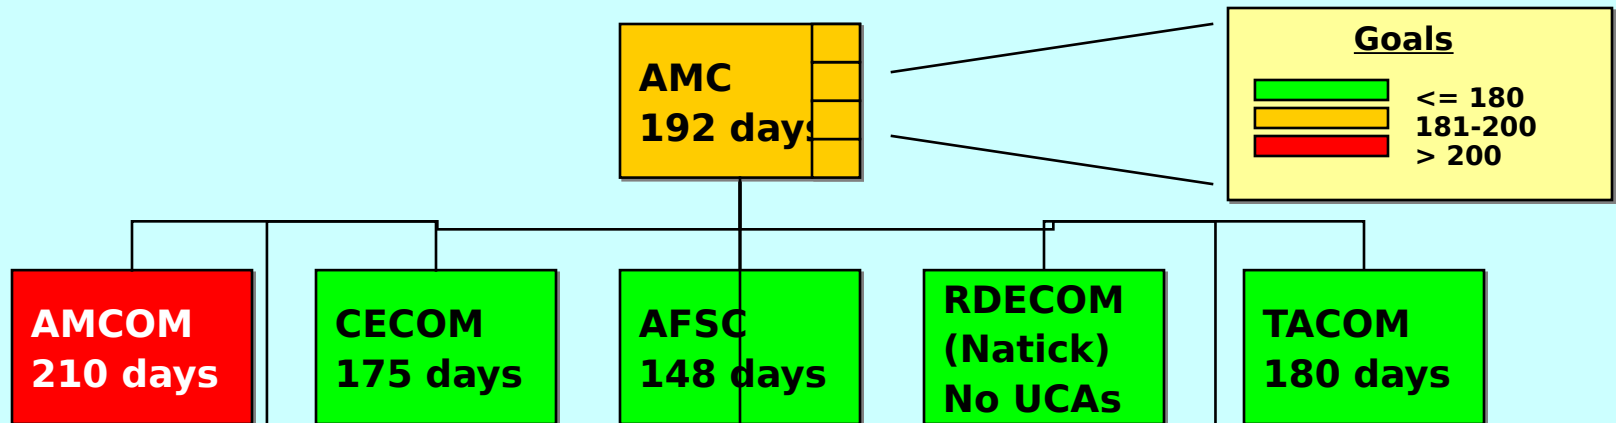

Measure: C3e - Avg # Days to

Level 1 Owner: Jeff Parsons

Definitize Measure Definition:

Measures the average age in days of UCAs at the time of definitization.

[\[click\] on MSCs below for drill-down data](#)

C3f - % UCAs Definitized w/i 180 Days - 4Q05

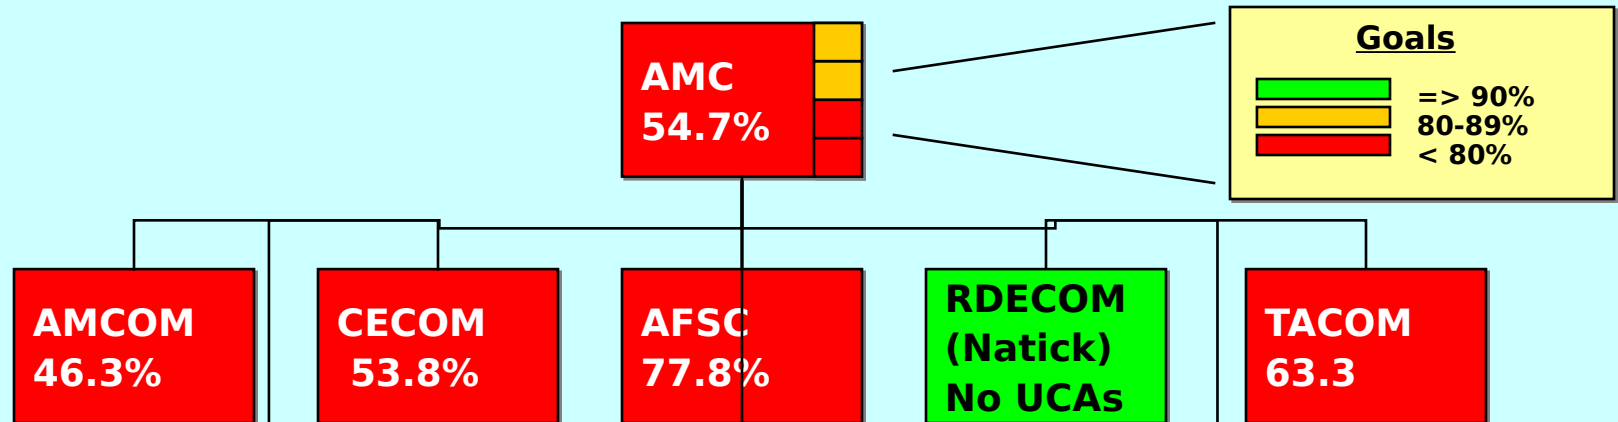

Associated SRS Objective: Level-1, C3 - Support Army Acquisition

Measure: C3f - % UCAs Definitized w/i 180 days

**Level 1 Owner: Jeff
Parsons**

Measure Definition:

Measures the percentage of UCAs definitized within the prescribed 180 day limit.
